Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 43-54 remain pending

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Response to Arguments

The Applicants arguments filed on October 31, 2005 have been fully considered. The amended claims are rejected in reconsideration of Kara, (WO 97/14117). See following rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 43 and 49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kara, (WO 97/14117) in view of Berson (US Patent No 5,768,384)

As per claim 43, and 49,
Kara ('117) discloses a method for shipping/mailling articles comprising the steps of: producing the shipping/mailling data for generating a shipper's label.(Figure 16b; also page 34, lines 5-25)
referring to an electronic address book (Figures 17 [element 1708, existing database])
referring to a database of valid addresses for validation (Figures 17 and 18)
Kara ('117) does not explicitly disclose generating shipping/mailling data for one of the articles at one of a plurality of client terminals which are linked to a host terminal, wherein generating comprises information transfer between the client terminal and the host terminal. Berson ('384) discloses generating shipping/mailling data for one of the articles at one of a plurality of client terminals which are linked to a host terminal,(Abstract) wherein generating comprises information transfer between the client terminal and the host terminal. (Figure 3) It would be obvious to one having ordinary skill in the art at the time the invention was made to combine the Kara method with the Berson in order to reduce the cost of operation by utilizing a network that can be centrally managed.

Art Unit: 3621

Claim 49 is in parallel with claim 43 and is rejected for at least the same reasons.

Allowable Subject Matter

Claims 46-48,50-53 are allowable over the prior art record.

Claims 44 ,45,50 and 51 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.
